Education

BS Computer Science Namal University Mianwali	CGPA: 3.60
Intermediate (ICS) Government Graduate College Sahiwal	87%
Matriculation Divisional Public School & Colleges Sahiwal	92%

Technical Skills

Programming Languages: C++, MySQL, Python
Core Concepts: OOP, Data Structures, Analysis of Algorithms, Database Management System
Other: Assembly Language, Computer Networking Fundamentals

Projects

- **Fair & Unbiased Assessment System | Python, Flask, MySQL, HTML, CSS**
 - Developed a full-stack academic assessment platform using Flask, MySQL and HTML/CSS supporting role-based portals for Admin, Faculty, and Students.
 - Designed a normalized MySQL database (3NF) and implemented views, stored procedures, functions, and triggers to ensure data integrity and support future AI-assisted evaluation.
- **PAC-MAN Game | Assembly Language**
 - Engineered a low-level game using the Irvine32 library.
 - Implemented a PAC-MAN clone in x86 Assembly featuring keyboard-controlled movement, collision handling, score tracking, and enemy interaction.
- **Society Resident Management System | C++**
 - Built a multi-module system for registration, billing, events, hospital, and store management.
 - Applied object-oriented design and persistent file storage for efficient resident data management.
 - Added input validation for reliability and accuracy.
- **UNO Card Game | C++, Raylib**
 - Built an interactive GUI-based UNO game implementing complete game mechanics, turn management, card effects, and dynamic player interactions.
 - Applied core Data Structures and Algorithms concepts to optimize deck operations, player management, and real-time game state updates.
- **Password Cracker Simulator | Data Structures**
 - Developed an educational password security simulator demonstrating brute-force and dictionary based attack strategies to analyze password resilience.
 - Compared attack strategies and analyzed password strength under varying complexity conditions.
 - Generated results to estimate cracking time and evaluate security efficiency.

Extracurricular Activities

- **Head of Technical Team | Namal Computing Society (NCS)**
 - Led the technical team in organizing university-level technology events, overseeing technical operations, event logistics, and participant coordination.
- **Head of Badminton | Namal Sports & Adventure Club (NSAC)**
 - Organized interdepartmental matches, coordinated team activities, and promoted student participation in sports and recreational events.
